Z3e

PREMIUM DESKTOP EMBOSSEER

PREMIUM DESKTOP EMBOSSING

Meeting the growing trend for instant, in-store card issuance, this Premium Desktop Embossing system gives you a reliable solution incorporating excellent issuance quality at a high security level. The Z3e is a compact desktop embosser that includes different versions based on the customer's specific needs. It is a perfect solution for financial institutions, smaller service bureaus, retail organizations, and others seeking a simple and cost-efficient product to meet their low volume or instant card issuance requirements.

COMPACT DESIGN & QUIET OPERATION

With its compact, avant-garde design and extremely quiet operation, the Z3e plastic card personalization system is ideal for branch, reception, store or office environments where space is usually very limited and noise needs to be maintained at the lowest possible level. Front-side input and output hoppers make it even more convenient for easy accessibility to your cards, and the flat top cover also reduces desk space usage.

MULTIPLE APPLICATIONS

The new Z3e combines embossing, rear/front indenting and tipping, together with encoding options for magnetic stripe, contact and contactless chip modules. To give your cards that final elegant touch, the Z3e features our Professional Tipping Module. A remarkable feature of this module is the availability of a wide range of tipping colors and an incredibly long lasting ribbon (up to 4,000 cards)!

RELIABILITY & QUALITY

The entire Z3e system is based on durable metal drums with hardened steel punching characters. Drums provide the best quality for embossing and indenting by pressure controlled action with a high precision positioning. You can choose from 80 to 160 characters depending on your needs. Availability of a remarkably vast range of a specific national characters permits you to use it anywhere in the world!

SYSTEM SECURITY

Enhanced data security was a crucial aspect while designing the new embosser's range, and Matica System realizes how important it is to prevent cards from theft and fraud, thus the Z3e Premium Desktop Embosser is equipped with many security features, including physical locks.

EMV STANDARD COMPLIANCE

The Z3e provides physical and logical security conformed to current Europay, VISA and MasterCard guidelines.
